1950 Fuchsia

All 1950 introductions \$1.00 each.

Any 6 of the following for \$5.00, or 12 for \$10.00

ALAMEDA

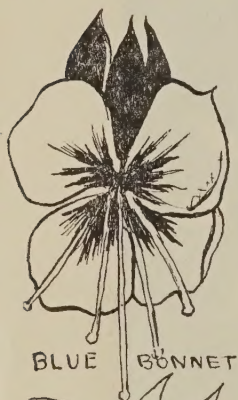

ALAMEDA (Niederholzer t, sh) White and red, double. Corolla clear white lightly veined with crimson. Sepals broad upturned very bright red. A fine upright bush of vigorous growth. Dark green foliage.

BERNADETTE

AUNT JULIANNA (Hanson t,sh) Large pale lavender and red sport of Uncle Jules. Corolla, pale lavender blue; sepals same as Uncle Jules rose red. Large flowered double for hanging basket.

BERNADETTE (schnabel b,sh) Medium sized veronica blue and pale rose. Corolla very double light blue; sepals recurved pale rose. A fine new pot plant growing as one of its parents, Winston Churchill.

BLUE BONNET

BLUE BONNETT (Hodges sh) Large single purple and red. Corolla flat open as Oregon Trail, purple-blue prominently veined red. Sepals turned back and twisted. A beautiful hanging basket.

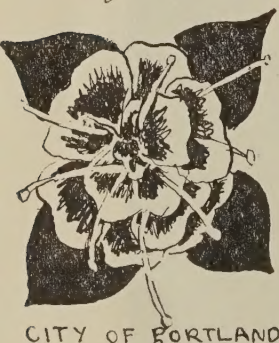

CAMEO (Schnabel b,sh) Low bush pale pink double. Corolla very delicate pink double; sepals a deeper light pink than corolla. A self-branching pot plant.

CAMEO

CITY OF PORTLAND (Schnabel t,sh) Very double, large purple and red. Corolla short petunia purple marbled with light carmine. Sepals broad granular. A clean upright plant which recovers quickly from winter dormancy and flowers abundantly.

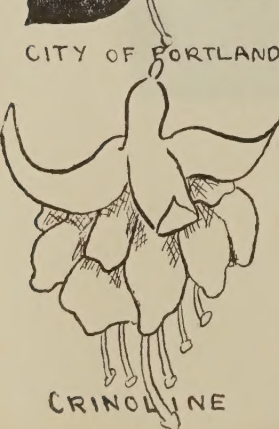

CRINOLINE (Reiter t,sh) Patented. A large puffy double rosy pink and white. Corolla lighter pink of Seventeen but much larger and fuller. Sepals rosy white tipped green. The flower is large and of wonderful substance. Strong upright plant with many flowers. Absolutely different, and tops in pastels.

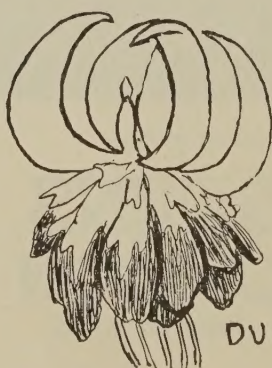

CITY OF PORTLAND

DUBARRY (Tiret t,sh) Patented. Double fuchsia purple and pink. Corolla pink marbled into fuchsia purple; sepals pink broad reflexed. Large flowers on upright bush. A distinctive coloring.

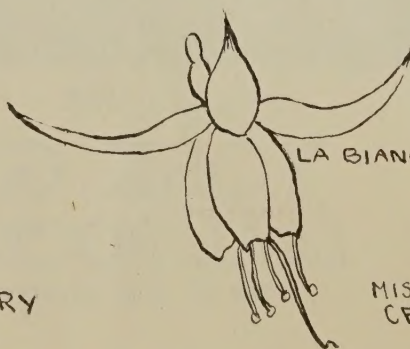

LA BIANCA (Tiret t,sh) Patented. Small single white. Corolla single white, sepals white spreading, tipped with green. Medium upright growth. Lots of blooms.

MISS CENTENNIAL

introductions

MERLE HODGES (Hodges sh) Very double huge soft powder blue and rosy red. Corolla is like a large powder-puff of lavender blue lightly veined fuchsia pink; sepals broad upturned rosy red. A super trailer. Mr. Hodges has selected this one to name for his wife. Should be a honey.

MISS CALIFORNIA (Hodges sh) Large single to semi-double white and pink. Corolla white with light pink veining at base; sepals long upturned medium pink. Good hanging basket.

MISS CENTENNIAL (Nessier m.sh) Single medium sized purple and red. Corolla purple veined red, with dancing spreading scalloped petals; sepals upturned red. Flower opens wide as ages. Upright growth.

MRS. MARTIN O'BRIEN (Nessier m.s) Double bright red. Corolla vivid red of Pride of Exeter coloring; sepals upturned broad red with orange tint. Upright growth. Very showy plant, with vivid flowers.

NEW HORIZON (Reiter t.sh) Patented. Large double light blue and pale rose. Corolla crispy light pale blue very double; sepals large upturned claw of palest rose. Upright growth with light green foliage. Blooms early with many flowers.

NIOBE (Reiter sh) Patented. True trailer, large semi-double bright tyron rose and rosy white. Corolla bright deep rose; sepals spreading long pointed rosy white. Growth of Cascade only larger, better substance, more vivid and blooms as well.

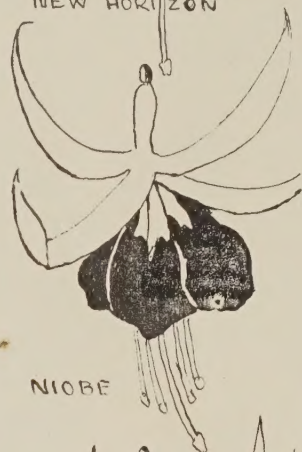

PINK ELEGANCE (Niederholzer sh) True trailer large single pink. Corolla bell-shaped long bright phlox pink; sepals long spreading lighter pink. A lovely showy trailer with many flowers. Drawing on cover.

ROULETTE (Reiter m.s) Double, intense rose and white. Corolla vivid red shaded with orange. Sepals usually five or six rosy white. A semi-trailing plant, used as spreading basket or staked bush or standard. Very showy.

VIENNA (Niederholzer t.sh) Double purple and red. Corolla long spreading petals splashed with rose red at base; sepals long recurved rosy red. Vigorous upright growth, self-branching and free blooming.

REX BEGONIAS

We now have Rex's to sell here at the Gardens. Rex's are grown for their beautiful leaves, which, on some **varieties** will reach 20 inches in length. They come in various shades of red, black, green, lavender, white, all blended to make striking color combinations. Most of them do bloom, as the Angel Wing Begonia and some are very fragrant, but the leaves, some curled and ruffled, are the main feature. They may be grown as house plants or, in the summer, in the shady garden. Rex's want light but not direct sun.

Potted in a friable soil of leaf mold and good garden soil they add a showy spot to any garden or home. If placed on the ground, they should have a bed of cinders or gravel as chewing insects like them very much, and of course, their beauty is in their large perfect leaves. Keep well sprayed with water. On hot days the foliage will droop but a fine spray of water will bring them up fresh and lovely again in a few hours. Some good liquid fertilizer will keep them in good condition and bring on the new leaves. Repot when they become root bound.

TUBEROUS BEGONIAS

We will not have tubers to sell this year but visit our gardens where we will have baskets and pot plants to sell in bloom. We will also have a display of thousands of blooms in our greenhouses which will make it well worth your while to visit the gardens.

PELARGONIUMS OR MARTHA WASHINGTON GERANIUMS

The Pelargoniums will be sold for the same price as last year. Refer to your 1949 catalog for prices and mailing instructions.
